BADFINGER "No Dice" review

L.G.

From the makers of "If You Want It Come And Get It" comes another equally interpretive swinger complete with buzz guitar and ferocious vocals. The greatest problem is the lack of anything as strong as the above-mentioned title. Still, like early Beatles, the Baddies can boast a good depth production and some above average pop. The piano is at times very clever, but there isn't anything to boost it from the usual. "Love Me Do" (no relation to those other guys' song of the same name) is pleasant and seems to carry the other songs.
